

WES Centenary Celebrations

Date: 15 May, 2019

Location: Senedd, Cardiff

Are you passionate about your work?

Do you want to share your excitement with others?

Or are you looking for a friendly environment in which to practice public speaking?

If so, don't miss this opportunity

In 2019, WES is looking for women engineers from any field of work to present their topic at the WES Centenary celebrations in Wales as a way of promoting female engineers and their engineering passions.

This is a fantastic opportunity to display your interests to other women and men in STEM related areas, to share knowledge and practise public speaking. The talks are intended to be on a diverse range of topics including previous work or future developments within your chosen field. The more creative, the better.

Speakers will be given 10 minutes to present from the stage in the Senedd and then will exchange their position. Speakers will present their work several times throughout the evening, allowing the audience to rotate and participate in several of the talks. Props, display items and activities to excite your audience about your chosen topic are wholeheartedly encouraged!

Please send the attached application form to:

Wales@1919.wes.org.uk

Closing date for applications: 14 April 2019

Require further information? Please email,

Wales@1919.wes.org.uk

Reference: Centenary future engineering competition.

Application Form

We are looking to select a number of enthusiastic participants to speak for 10 minutes at the WES Centenary Celebrations in Cardiff. The more engaging and vibrant your application and talk, the better you will help us to celebrate 100 years of the Women in Engineering Society! Please include the information below as part of your application but feel free to present it in any way that will help to demonstrate the enthusiasm you have for your subject.

Full name:	
Profession:	
Company/University:	
Email:	
Twitter handle:	
LinkedIn:	
Preferred contact methods:	
Tell us a bit about you!	
What inspires you in engineering?	
Tell us about your proposal for your talk. This can be presented in any way you would like, including links to dropbox accounts if the files are too large.	
How would you engage the audience for your session?	
What's your fun fact about engineering?	
Photo of yourself	
<input type="checkbox"/> I agree to WES publishing the information and photo provided in this form on their website, newsletter and other marketing material. WES will not publish email addresses, postal addresses or phone numbers, nor share these with other organisations or individuals outside of WES and not involved with the administration of the conference.
